

Industrial GPS tracking devices for establishing peace of mind for high value assets in transit

HEAT HT3000 Fleet Track Kit

-  **Permanent installation**
-  **Monitor vehicle location and status**
-  **Predict maintenance and view MILs**
-  **Full Garmin FMI integration**

The HEAT HT3000 is a full-featured fleet vehicle tracking solution. The HT3000 is fully compatible with all of the HEATTrack platform features including geofencing, bread-crumbs history, routing distances and real time positioning. It also enables full vehicle maintenance monitoring for things such as engine hours, engine/fluid temperature status and many other monitoring features. This unit is compatible with Garmin FMI (Fleet Maintenance Interface) enabled devices, creating a powerful fleet tracking and driver navigational aids – including routing dispatches managed by the central office, two-way communication with the driver vehicle via OSD, auto-arrival at stop notifications and even driver ID logins. (some features – additional monthly fee)

Kit Includes

- HT3000 permanent install tracker
- Speaker / microphone
- Power connection cable with relay
- iButton driver ID

Features

- GPS tracking
- Geofencing
- Motion Detection / Tow Alarm
- Compatible vehicle information
- Route dispatching
- Status communications
- Text message support
- Alert pop-ups
- Driver identification login

General Specifications

Dimensions	105mm*78mm*24mm
Weight	140g
Operating Voltage	8V to 32V DC
Operating Temperature	-30°C ~ +80°C
Geofencing	Radius, Polygon or Route based
Motion Detection	Alert on motion or at rest / Tow Alert
Temperature Alerting	Min/Max Thresholds
Digital Inputs	Four digital inputs. Two positive trigger inputs and two negative trigger inputs
Two-way Audio	Speaker and microphone
Backup Battery	Li-ion 1000 mAh
