

Industrial GPS tracking devices for establishing peace of mind for high value assets in transit

# HEAT Smart Appliance Tracking

-  **Enable any mobile device for tracking**
-  **Receive reports on sales team locations**
-  **Accurately track field logistics teams**
-  **Automated alerts based on geofencing**

The HEAT Smart Appliance Tracking (SAT) solution allows users the ability to add any iOS / Android / Blackberry device into the enterprise management solution. Simply send a license request from the server to the target mobile device and upon accepting the license, the mobile device becomes a fully enabled GPS asset tracker. The SAT software is optimized to use minimal device storage space and battery power. Receive reports on when technicians arrive at a location or how long a salesperson is on the road. Additional tracking options allow for mileage tracking as well as conformance to speed limits.

## General Applications

- Internal road staff
- Subcontracted installation teams
- Security tracking of company devices

## Features

- GPS tracking
- Ability to locate personnel closest to a specific location at any given moment
- Ability to send directions immediately to mobile user to site dispatch
- Geofencing with alerts
- Speed alerts
- Mileage tracking
- Automated report distribution
- Low power consumption

## General Specifications

<b>Program size</b>	<b>Lightweight &lt;64k</b>
<b>Power Consumption</b>	Less than 15% of battery life used at 5 minute update intervals
	Tracks even when device is in suspend mode
<b>Geofencing</b>	Radius, Polygon, Route or Landmark based
