

Industrial GPS tracking devices for establishing peace of mind for high value assets in transit

HEAT HT1000w Asset Tracker

-  **Long Standby Time – up to 1,800 days**
-  **Waterproof Model**
-  **Rechargeable batteries**
-  **Configurable reporting frequency and alerts**

The HEAT Asset Tracker enables intelligent cargo management in more demanding environments. Tracking systems currently utilized by expedited or common carrier services do not adequately provide reliable and current details for mission critical delivery services. While their systems may provide last known location, the time you need actual tracking information is when the item is *not* where it should be *now*. Further, the HT1000w offers advanced insight into environmental conditions of your critical items. Updated version now includes a rechargeable battery pack HEAT tags are enterprise manageable from a singular interface, using mobile applications or a web platform.

General Applications

- Irreplaceable work product
- High value artwork
- Electronics
- Equipment enclosures
- Prototypical work
- LTL/LCL shipments
- Expedited shipping services
- Courier services
- Just in time (JIT) Scheduling

Features

- GPS tracking
- Geofencing
- Motion Detection
- Ambient Temperature Monitoring

General Specifications

Dimensions	118mm*69.5mm*26.8mm
Weight	140g (with batteries)
Batteries	1 rechargeable tri-CR123A lithium
Standby Time	TCP reporting standby: One report per day: 1800 days Four reports per day: 510 days Five minute reporting: 11 days
Operating Temperature	-20°C ~ +60°C
Geofencing	Radius, Polygon or Route based
Motion Detection	Alert on motion or at rest
Temperature Alerting	Min/Max Thresholds
Waterproof	IPX7 compliant
